The Perfect Clock For Every Job

Gather employee time via hardware, software, telephone, and/or smartphone. Choose just one or as many different collection methods as you need to accommodate your organization's requirements. Whether you need keypad entry, swipe card readers, door access, proximity readers, biometric (finger scan verification) scanners, or labor costing features—there is a clock to get the job done.

hardware time collection

V800 & V850 Biometric TimeClock

*V850 requires TimeForce Job Costing module.

No cards to carry or lose. Our fast, award-winning clocks in our Velocity Series, are biometric and use a one-to-one scan of an employee's finger to clock in and out – eliminating buddy punching. The V850 has the additional functionality of job costing and departmental transfers.

V800 & V850 Rugged Edition

*V850R requires TimeForce Job Costing module.

We've taken the nuts and bolts of the Velocity 800's and turned them into the hardest working clocks on terra firma. The Rugged Edition clocks are super tough, weather resistant, and built to withstand drops up to 3 ft. The clocks are completely mobile, the batteries hold a charge for 12 hours and can be recharged using your vehicle power supply or a standard outlet—making the Rugged Edition clocks perfect for construction sites, industrial settings, and outdoor environments.

IQ1050 TimeClock
Optional Biometric Reader

As our flagship data collection terminal, the IQ1050, our most advanced time clock, delivers the capabilities required for even the most demanding applications.
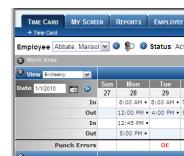

IQ500 TimeClock

This unit is a sophisticated, feature-rich system with the ability to perform job tracking and costing functions as well as departmental transfers. In addition, the IQ500 offers extended time tracking features such as break and lunch buttons and multiple pay rates.

IQ200 TimeClock

The entry level IQ200 is perfect for small to mid-sized companies looking to perform primarily time and attendance only monitoring. It includes a USB port that allows for easy data transfer by USB Flash drive.

software time collection

TimeForce II: Self Service

Employees can input time directly from their desktop using TimeForce with Self Service—which is offered on a per-seat basis. Employees have access to MyScreen where they can view accrual balances and request time off.

Net TimeClock

Net TimeClock provides a simple and easy interface for employees to clock in and out though a PC interface. With Net TimeClock, you can easily set up a terminal or kiosk for employees to clock in.

remote time collection

Mobile App
for iPhone® (3G & 4G), BlackBerry®, iPad® & iPod touch®.

The **TimeForce II Mobile App** is perfect for companies with telecommuters, field workers, service technicians, and anybody else on-the-go. The Mobile App captures a GPS location, so you can also verify where your employees clock in/out. For those needing the convenience of clocking in/out from any telephone, our **Telephone Login Plan** is a great solution.

Whichever time collection device(s) you choose, TimeForce gathers your data; tracks all accruals; and exceptions such as tardiness, absenteeism, or abuse of break or meal periods. Everything integrates seamlessly. We have the solution for you.

TimeForce II ™

- On Demand (real time) access to information, available on some models clocks.
- easy to use and quick to learn
- multiple web browser support
- unlimited employees, pay policies, and shifts
- simplified tracking of all accruals, such as sick and vacation time
- error checking system to evaluate time punches against shift and pay policies
- automatic time entries for approved absences
- and much more...
